Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/1/2008 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1, 4-12, and 14-27 rejected under 35 U.S.C. 102(b) as being anticipated by Manjarrez (US 5,746,215).

Manjarrez discloses in Figure 1-11 a needle protector comprising a body (20); side walls having a retaining member (72) and guiding ledges (edges of 54) defining an axial groove; an outwardly extending radial flange (52); a distal open end comprising a cap (Figure 10 – note that it is the Examiner's belief that Figures 10 and 11 are mislabeled; based on descriptions of numerals 64 and 70 in Figures 2-9, it is believed that Figure 10 is the distal end and Figure 11 is the proximal end); a retaining member (84) and a proximal open end (Figure 10) sized so that hub cannot pass through and comprising a multiple profile window having a smaller and larger cross sections.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 13 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Manjarrez as modified by Hajianpour (US 6,908,455).

Manjarrez discloses the claimed invention except for the body being comprised of a substantially transparent plastic material. Hajianpour discloses in column 7, lines 47-50 the body being comprised of a transparent plastic. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the system as taught by Manjarrez with a transparent plastic as taught by Hajianpour, since such a modification would provide visual access of the contents inside the body.

Response to Arguments

Applicant's arguments filed 5/1/2008 have been fully considered but they are not persuasive. It is the Examiner's position the guiding ledges (54) of Manjarrez do define an internal groove, as the edge of the ledge does extend into the housing.
